

## Solar simplified to save you more money

**Turn unproductive land into energy savings and new revenue!** Powerfield Energy Inc. has developed a revolutionary simple solar energy system ideal for rural commercial and industrial customers. Powerfield's patented solution can be easily installed, is modular, scalable, and fits beautifully into virtually any landscape.

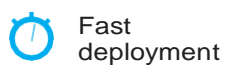

### MOST POPULAR APPLICATIONS

- Agricultural
- Electric Co-ops
- Commercial
- Industrial

### BENEFITS

- Save money
- Increase revenue
- Installs easily
- Durable for decades
- Modular & movable
- Low profile
- Low maintenance
- Use your own / local labor
- Made from recycled materials
- Made in the USA

## Frequently Asked Questions

### What's special about Powerfield's systems?

Powerfield makes the simplest solar installations in the world. We designed our systems to save you more money and accentuate your landscape. Other systems require major construction, ground penetration with digging, pile-driving or pouring concrete, nuts and bolts and specialized tools and labor. Powerfield systems can be rapidly installed without any of that, are modular, and easily scalable as your energy needs grow.

### How much will it cost and how much will I save?

It depends on several factors: 1) your energy needs, 2) your energy costs, 3) your available land, 4) tax incentives, and 5) how big of a system you need. With those in mind, Powerfield's goal is to provide you with a system that costs less than the competition and saves you money for years to come. We will work with you to right-size any system and not push you to buy more than you need.

### Can Powerfield tailor a solution specifically for me?

Yes. We can tailor a solution to fit your particular needs and work with you to configure the system in anyway and with virtually any components that you prefer.

### Does Powerfield offer a pre-packed system?

Yes. We can offer you a pre-packaged "Solar Farm in a Box" system that is designed to be modular and easily scalable, much like a Lego set.

## Powerfield System Specs

Panels & Electrical	Top tier manufacturers
Patented SimpleRack	Recycled HDPE
Ballast Material	Local, natural gravel
Tilt Angle	25°
Wind Load	ASCE 7-10, 120 mph+
Warranty	25 years
Useful Life	40 years

### What if I need to move the system for some reason?

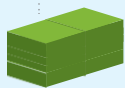

Powerfield systems give you the peace of mind that once they are installed they will last for decades with virtually no maintenance. Made with durable materials and installed to withstand extreme wind and weather, Powerfield systems are permanent. But if your land or energy needs change, Powerfield gives you the versatility to move it.

### How much maintenance will be needed?

Very little, if any. Depending on your site, the solar panels may need to be washed a couple of times per year and you may need to trim or mow to prevent the vegetation from overgrowth. Otherwise, the panels and electrical equipment will last outside for decades but if they do fail, Powerfield will work with you and the manufacturer to see that they are repaired or replaced. If Powerfield's SimpleRacks break, we will replace them at no charge.

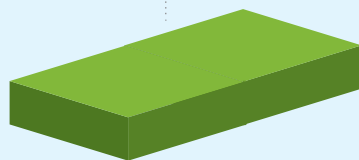

## How much land will I need?

Center Pivot  
Watering Pump  
25kW DC system

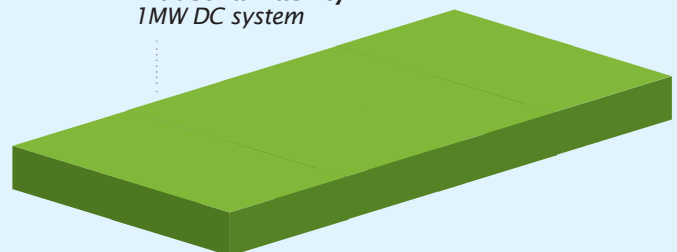

0.1 Acre

Grain Storage  
Operation  
250kW DC system

1 Acre

Large Commercial/  
Industrial Facility  
1MW DC system

4 Acres
